

PARTNER ORGANISATION EVALUATION LETTER

I, Zsanett Füg, the curator of Ifjúsági Stratégiai Kutató Központ Alapítvány, participating in the project **Coaching as skill for youth empowerment** (COA-SK-YEM, ref.no. 2024-1-EL02-KA153-YOU000205124) as a partner organization, officially confirm that our Foundation is glad to have had the opportunity to be in the partnership, and we evaluate the project as a successful one.

We joined this project wishing to contribute to measures and initiatives which have the potential to develop overall quality and effectiveness of youth work. The project offered us a unique possibility to gain knowledge about coaching skills and understand how coaching can support personal growth, enhance performance, and improve overall well-being. Our Foundation has worked on youth development before, but our young leaders had not yet been equipped with the right tools to address coaching methodologies and stress management techniques prior to this project.

Our Foundation certainly has benefited from taking part in the project, as our involved leaders became equipped with practical coaching skills, including developing their ability to listen actively, ask powerful questions, provide constructive feedback, and facilitate goal-setting processes. The participants brought back invaluable knowledge and connections while gaining unforgettable experiences.

After their return, our participants successfully conducted two follow-up workshops on August 29th and August 31st, 2025, in Baja and Szeged, Hungary. These workshops creatively adapted activities learned during the project, including guided relaxation exercises and partner coaching sessions that allowed local participants to experience the essence of coaching through immersive, hands-on activities. The individual evaluations from our participants also demonstrate the profound impact of this project on their personal and professional development. They gained new perspectives on goal-setting, self-awareness, cultural exchange, and leadership skills, and they continue to apply in their youth work activities.
